RESEARCH EXPERIENCE

Influenza

Supervisor: Prof. Michael W. Deem

June 2018 - September 2018

Rice University, Houston, TX

- We found a method to predict H3N2 vaccine efficacy just from sequence information and statistical mechanics model. It's a good prediction with an r-squared equals to 0.91.
- I give a poster presentation about this project is given in the 4th Annual Smalley-Curl Institute(SCI) Summer Research Colloquium and a paper for it is under writing.

DNA sequence information

Supervisor: Prof. Yiqin Gao

October 2017-Present

Peking University, Beijing, China

- We calculated the long-range correlation of DNA sequences of different creatures to find out the relationship between DNA sequences, chromosome structure and biological properties.
- This project is supported by Beijing Training Program of Innovation and Entrepreneurship for Undergraduates.

Molecular Modeling for DNA

Supervisor: Prof. Yiqin Gao

April 2017-June 2017

Peking University, Beijing, China

- The whole project is aimed to find the mechanism of DNA recognition and catalysis for HHaI, a DNA methylase. I participated in the beginning part to simulate DNA base-flipping use Amber 14.
