RESEARCH EXPERIENCE

Influenza

Supervisor: Prof. Michael W. Deem

June 2018 - September 2018

Rice University, Houston, TX

- We developed a method to predict H3N2 vaccine efficacy with high accuracy just from sequence information and statistical mechanics model.
- I presented a poster about this project in the 4th Annual Smalley-Curl Institute(SCI) Summer Research Colloquium and a paper for it is in progress to illustrate the findings.

DNA sequence information

Supervisor: Prof. Yiqin Gao

October 2017-Present

Peking University, Beijing, China

- Calculation of the long-range correlation of DNA sequences of different creatures, and data analysis for the relationship between DNA sequences, chromosome structure and biological properties.
- This project is supported by Beijing Training Program of Innovation and Entrepreneurship for Undergraduates.

Molecular Simulation for DNA

Supervisor: Prof. Yiqin Gao

April 2017-June 2017

Peking University, Beijing, China

- The project objective is to find the mechanism of DNA recognition and catalysis for HhaI, a DNA methylase. I am one of the team members to simulate DNA base-flipping using Amber 14.
